The road ahead

Overview

What has been done?

- ▶ A classified catalog and its applications in the TLS
- ▶ Signup, Text-critical editing and Bibliography in the TLS
- ▶ Facsimile display
 - ▶ prototype available, not yet implemented widely
- ▶ New texts
 - ▶ 1100 medical texts added in Feb 2024
- ▶ Converted from DokuSky markup
 - ▶ Emergency Preparedness Recipes to Keep at Hand 肘後備急方 by Ge Hong 葛洪
 - ▶ KR3ec003 本草經集註
 - ▶ For this text, text-critical information has also been added from separate file
 - ▶ -> This required a number of modifications to the text and annotation model

Details of the changes

- ▶ Display the source text in multiple colors
 - ▶ This interferes with the selection process for annotations
- ▶ New annotation types (extension of the concept of CONCEPT)
 - ▶ 'Substance Entries' for information about medical substances
 - ▶ Persons, Places, Recipes, etc (see complete list)
- ▶ Currently, these have been added as an extension to the CONCEPT model
 - ▶ but maybe this is not the way to go?

Review of last years wishlist

- ▶ What follows is a new look on the roadmap as of 10 months ago (The slides are online for 2023-07-07)
- ▶ We need to review and prioritize what can be done
